

## INFORMATION & CARE INSTRUCTIONS

### ABOUT ENDUROSHIELD

Acting as a shield, the coating bonds to the glass and helps protect it against dirt, grime, and soap scum. It also protects against staining, etching or discoloring of the surface.

EnduroShield repels both water and oil, leaving an easy to clean surface that is very similar to a non-stick fry pan. The coating is also completely invisible and does not change the look or finish of the surface. This means you clean less often with less effort, and the surface won't deteriorate over its life as untreated surfaces do.

EnduroShield reduces cleaning time by up to 90%. You also don't have to purchase a specific after-care product to extend the life of EnduroShield. This saves you time and money. It also keeps your surface looking as good as the day it was treated!

### CARE INSTRUCTIONS

To keep your glass shower door looking new, the glass needs to be cleaned each week using a damp microfiber cloth and a mild detergent to remove any soap scum, dirt or grime from the glass. It is also recommended that you use a squeegee after each use to reduce any buildup.

Be careful not to use any rough, gritty, highly acidic, alkaline or abrasive cleaners such as Comet or Ajax. They may damage the protective coating.

We recommend the following cleaners:

1. "Sparkle" - we highly recommend this product and sell it in our showroom!
2. Lysol 4 in 1 Bathroom Cleaner
3. Fantastik Orange Action
4. Green Works Natural Glass & Surface Cleaner (by Clorox)
5. CleanShower Daily Shower Cleaner (Arm & Hammer)
6. Windex

Although these cleaners can be used, EnduroShield is designed to be an 'Easy Clean coating' that requires only mild soaps that do not contain harsh or toxic chemicals to maintain the surface effectively. It should be noted that with any cleaner used on the EnduroShield surface, a thorough rinse with clean water should follow immediately.
