

ABOUT ENDUROSHIELD

EnduroShield

Acting as an invisible shield, the EnduroShield® coating bonds to the substrate and helps protect against dirt, grime and soap scum, and also from staining, etching or discoloring. EnduroShield repels both water (hydrophobic) and oil (oleophobic) leaving an easy to clean surface that is very similar to a nonstick fry pan. The coating does not change the look or finish of the surface, it just keeps it looking as good as the day it was treated. You clean less often, with less effort, and the surface won't deteriorate over its life like untreated surfaces. There are no specific after care products to purchase to maintain the coating, saving you time and money.

CARE INSTRUCTIONS

Shower glass needs to be cleaned each week using a damp microfiber cloth and a mild detergent to remove any soap scum, dirt or grime from the surface. Be careful not to use any rough, gritty, abrasive, highly acidic or alkaline cleaners as they may damage the protective coating. This includes products such as Comet (powder), Ajax, or cerium oxide which damage or polish back the actual substrate. It is also recommended that you use a squeegee after each use to reduce any buildup.

RECOMMENDED CLEANERS:

- Windex
- Lysol 4-in-1 Bathroom Cleaner
- Fantastik Orange Action
- Green Works Natural Glass & Surface Cleaner (Clorox)
- Clean Shower Daily Shower Cleaner (Arm & Hammer)
- Mr. Clean Magic Eraser when damp

It should be noted that with any cleaner used on the EnduroShield surface a thorough rinse with clean water should follow immediately. Although these cleaners can be used instead of the suggested maintenance, EnduroShield is designed to be an 'easy clean coating' which requires only vinegar and/or a mild detergent that does not contain harsh or toxic chemicals to maintain the surface effectively.
